

Legal Analytics® Professional Services

Custom Legal Analytics For Winning Strategy

Sometimes you will need to dive deeper into Lex Machina's data than you can with our Legal Analytics platform. In this case our professional services organization is happy to support you. When needed, our team of legal data scientists and analysts delivers customized reports and data services for litigation decision support, patent portfolio analytics, and public policy-making.

Party Profiles

Received a demand letter or a complaint from an unfamiliar party? Want to analyze prior litigation behavior by that party, including the counsel it has used and the litigation history or its asserted patents, to accurately assess the threat? Arm yourself with knowledge of how long these party's cases last and the types of outcomes they have achieved.

Law Firm Profiles

Want a comprehensive analysis of the tactics used, and results obtained, by your counsel, opposing counsel, or counsel you may want to retain? Our law firm profiles analyze counsel's experience with specific judges, parties, opposing counsel, patents, and technologies, including case outcomes and overall win-loss records.

Case Law Trends and Custom Reports

From damages awards and attorney's fees awards, to quantifying the application of legal doctrines, and statistical analysis of non-practicing entity litigation, we have confirmed suspected trends in case law that were difficult or impossible to assess prior to development of Lex Machina's Legal Analytics.

Unique Bankruptcy Appeals Data

Choosing among districts in which to file? Appearing in front of a judge for the first time? Go beyond the district and judge analytics in our platform with a profile report that synthesizes trends in motion practice and case outcomes, patents asserted, patent outcomes, time to claim construction, trial, and termination, and the court's experience with specific law firms and attorneys.

Peer Company Benchmarking

The most sophisticated companies not only use Legal Analytics to assess adverse parties – they use it to assess their own litigation strategies. Our peer company benchmarking reports evaluate strategic patent litigation behavior and compare it with the behavior of peers and competitors.

Lex Machina provides us unprecedented insight into the data needed to formulate effective litigation strategies.” – Liberty Media Corporation
