

Lex Machina Company Overview

Lex Machina's award-winning Legal Analytics® platform is a new category of legal technology that fundamentally changes how companies and law firms compete in the business and practice of law. Delivered as Software-as-a-Service, Lex Machina provides strategic insights on judges, lawyers, parties, and IP, mined from millions of pages of legal information. This enables law firms and companies to predict the behaviors and outcomes that different legal strategies will produce, helping them to win cases and close business. Based in Silicon Valley, Lex Machina is part of LexisNexis, a leading information provider and a pioneer in delivering trusted legal content and insights.

Technology

Our unique *Expressions Engine* creates data sets never before available about judges, lawyers, parties, and patents out of millions of pages of IP litigation information. *Attorney Data Engine* fixes incomplete and inaccurate litigation data supplied by the government. *Case List Analyzer* helps surface and analyze strategic information from only the cases that matter, quickly and easily.

With this information, for the first time, lawyers can predict the behaviors and outcomes that different legal strategies will produce.

Companies

Corporate counsel use Lex Machina to select and manage outside counsel, increase IP value and income, protect company assets, and compare performance with competitors. Corporate customers include Astra Zeneca, Nike, Microsoft, Google, eBay, and, along with startups and other companies.

Law Firms

Attorneys at law firms use Lex Machina to pitch and land new clients, win IP lawsuits, close transactions, and prosecute new patents. Law firm customers include Fish & Richardson, Wilson Sonsini, Fenwick & West, Morgan Lewis, and many others, from boutiques to AmLaw100.

"I cannot see how any outside counsel will be able to compete without Lex Machina."
