

## Lex Machina's Federal Motion Metrics

### Legal Analytics For Successful Motion Strategy

With Motion Metrics, Lex Machina takes *Legal Analytics* to a whole new level. For the first time, it allows attorneys to compare detailed motion outcomes and to select the motion strategy with the highest probability of success. Motion Metrics surfaces custom insights about motion practice tailored to the cases you care about.

## Craft Winning Case Strategy

Motion Metrics maps each motion to the order that determines its outcome. It also identifies which party filed the motion, which judge ruled on the motion, and how the judge ruled.

For example, Motion Metrics might show that a judge never grants motions to transfer out of her court.

With Lex Machina, an attorney can advise his client to save the budget for making a stronger case instead of spending it on a transfer motion that is almost certain to fail. Or alternatively, he could compare courts and judges to see who grants stays pending PTAB activity more often than others.

## Track Motion Chains

Motion Metrics makes it even easier to look through a case and identify the key motions and orders. Our technology links together all aspects of the “motion chain”. For example, if you’re looking at the opening motion, you can immediately see if it was granted or denied, as well as jump to the response, reply, or order, all in one click.

Understanding Motion Types Analytics

## Assess Your Opponents

Want to know upfront if your opponent tends to file motions fast and furiously? Or if they file only a few key motions?

With Motion Metrics, you can craft your motion strategy with confidence. You can easily determine the kind of motions your opponent tends to file in cases like yours and see if they have been successful.

*“Lex Machina gives us a competitive edge by enabling us to fund cases that have a higher value and a better chance of winning. That’s good for us and good for our clients.”*

– Kate Boyd, Chief Engagement Officer, Validity
