Lex Machina’s award-winning Legal Analytics platform allows outside counsel and in-house attorneys to predict the behavior of courts, judges, lawyers, law firms, and parties.

Over three quarters of Am Law 100 firms and many of the largest global corporations use Legal Analytics to supplement traditional legal research and reasoning with previously unavailable strategic insights that give them a winning edge.

Now, Legal Analytics is available for patent litigation in federal courts.
The Winning Edge

*Lex Machina* integrates district court trial data with PTAB and ITC litigation information. Discover meaningful patterns in prior litigation with granular data about case findings, case resolutions, damages awards, as well as time to trial, time to Markman, time to termination, and other key events.

Accurate and Comprehensive

No other product has more accurate intellectual property litigation data. Our unique technology crawls millions of pages of IP litigation information to build analytic data sets about parties, law firms, attorneys, districts, judges, and patents. It enables you, for the first time, to predict the outcomes that different legal strategies will produce.

Win Lawsuits

Uncover trends to bolster your litigation strategy. Learn about the behavior of judges, lawyers, parties, as well as all prior litigation concerning asserted patents. See average time to termination, outcomes, damages awards, and more. Explore the litigation history of your opposing counsel and evaluate their expertise in a particular matter. Gain insight into settlement rates, win/loss rates, and time to trial for opposing parties and counsel. Review previous arguments and set your strategy based on data.

Strengthen Your Patent Portfolio

Explore patent litigation outcomes, including findings of invalidity, infringement, and more. Gain insight into patent holders and their litigation behavior. Discover patent litigation volumes, litigated products, patent outcomes, settlement propensities, and damages awards.

“Lex Machina’s Legal Analytics allows me to uncover insights about judges, parties, patents, and opposing counsel unavailable in traditional research tools. It adds significant value for my clients.”
