

Legal Analytics® for Product Liability Litigation

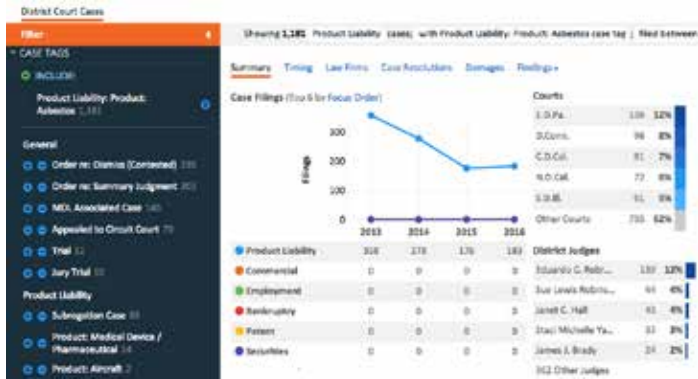

Lex Machina's award-winning *Legal Analytics* platform allows outside counsel and in-house attorneys to predict the behavior of courts, judges, lawyers, law firms, and parties.

Over half of Am Law 100 firms and many large global corporations use *Legal Analytics* to supplement traditional legal research and reasoning with previously unavailable strategic insights that gives them a winning edge.

Now, *Legal Analytics* is available for product liability litigation in federal courts.

The Winning Edge

Legal Analytics provides data-driven insights and trends in product liability case timing, resolutions, damages, remedies, and findings. Our comprehensive case set includes cases in which a party seeks compensation for injury caused by a defect in a product.

Lex Machina helps you answer questions such as:

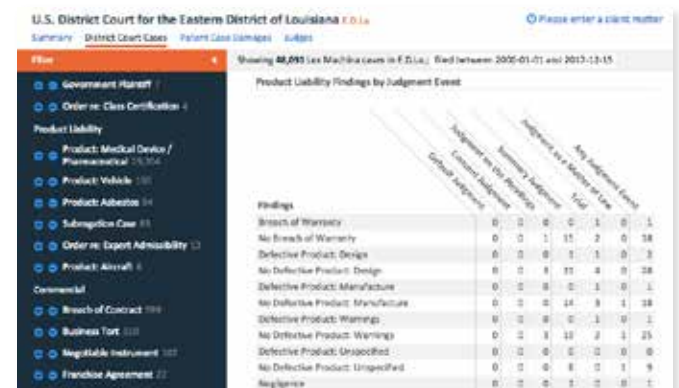

- § Which law firms have the most experience with medical device/pharmaceutical cases?
- § Which judges have heard MDL Master cases?
- § What is the largest damages award made in the Middle District of Florida since 2009?
- § How has a judge ruled on the admissibility of expert witnesses?
- § How many times has a firm succeeded in product liability subrogation cases?
- § How often – and in which specific cases – has a finding of breach of warranty been made in the Eastern District of Louisiana?
- § Has a particular expert witness ever been excluded or limited on a Daubert challenge?
