Lex Machina’s award-winning *Legal Analytics* platform allows outside counsel and in-house attorneys to anticipate the behavior of courts, judges, lawyers, law firms, and parties.

Over three quarters of Am Law 100 firms and many of the largest global corporations use *Legal Analytics* to supplement traditional legal research and reasoning with previously unavailable strategic insights that gives them a winning edge.

Now, *Legal Analytics* is available for product liability litigation in federal courts.
The Winning Edge

*Legal Analytics* provides data-driven insights and trends in product liability case timing, resolutions, damages, remedies, and findings. Our comprehensive case set includes cases in which a party seeks compensation for injury caused by a defect in a product.

Lex Machina helps you answer questions such as:

- Which law firms have the most experience with medical device/pharmaceutical cases?
- Which judges have heard MDL Master cases?
- What is the largest damages award made in the Middle District of Florida since 2009?
- How has a judge ruled on the admissibility of expert witnesses?
- How many times has a firm succeeded in product liability subrogation cases?
- How often – and in which specific cases – has a finding of breach of warranty been made in the Eastern District of Louisiana?
- Has a particular expert witness ever been excluded or limited on a Daubert challenge?

Unique Litigation Data

**Case Tags** – Our data includes the product classification tags Aircraft, Asbestos, Medical Device/Pharmaceutical and Vehicle, as well as the Subrogation case tag, to help you create your specific product liability case list.

**Damages** – Our data includes the following damages categories: Economic Damages, Non-Economic Damages, Other Product Liability Damages, and Punitive Damages.

“Lex Machina helps me get the information I need to do my job, quickly and easily.”

– Huong Nguyen, Senior Director IP, Impax
