Legal Analytics® for the Americans with Disabilities Act

Lex Machina's award-winning Legal Analytics® platform allows outside counsel and in-house attorneys to research and anticipate the behavior of courts, judges, lawyers, law firms, and parties.
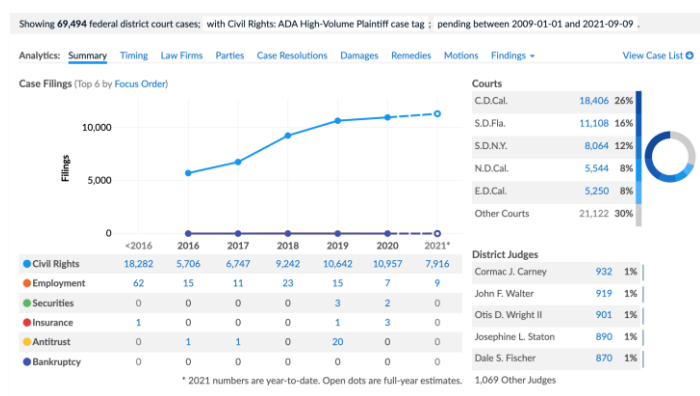

Over three quarters of Am Law 100 firms and some of the largest global corporations use Legal Analytics to supplement traditional legal research with previously unavailable strategic insights that gives them a winning edge.

Now, Legal Analytics is available for litigation involving the Americans with Disabilities Act (the "ADA") in federal courts.

Lex Machina
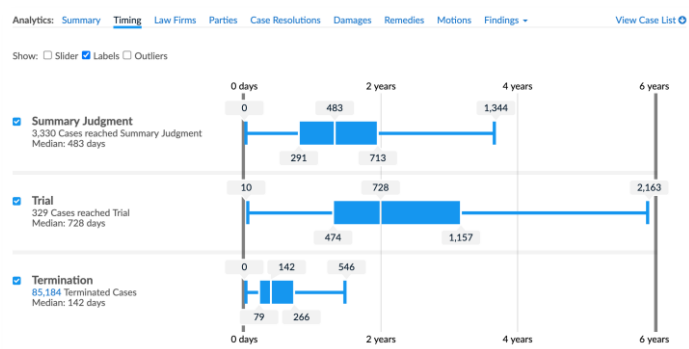

The Winning Edge

Lex Machina's Legal Analytics for ADA litigation provides valuable data-driven insights and trends in ADA case timing, resolutions, damages, remedies, and findings. Our case set includes cases with claims alleging: a law enforcement officer acting under color of law

- a violation of the Americans With Disabilities Act of 1990 (ADA), as amended by the ADA Amendments Act of 2008 (ADAAA), or

- a violation of a state disability rights law

Lex Machina helps you answer questions such as:

- Which cases had the highest amounts of compensatory damages awarded in the last five years? What were the specific amounts and what happened in those cases?

- Which law firms have the most experience representing defendants in ADA cases in federal court?

- Has my judge ever ruled on Discrimination? If so, how did they rule and at what stage of litigation?

- How many ADA cases resolved at trial and how often did claimants win? How many resolved in a likely settlement?

- What is the median time to summary judgment for ADA cases in the Central District of California?

Unique Litigation Data

Lex Machina allows users to filter by the following information in order to find the most relevant cases:

Damages
General Compensatory Damages, Punitive Damages, Nominal Damages, and State Statutory Damages
