With their proximity to Houston, Fort Bend County courts are important venues for Texas state court litigation. Thus, practitioners can search for meaningful information from one court, several Houston-area courts together, or across all state offerings.

The Winning Edge

Lex Machina gathers raw information from state court cases and the underlying documents, and then uses a unique Natural Language Processing engine to clean, tag, enhance, and present the resulting data in a way that allows users to make data-driven decisions. Lex Machina is the only analytics provider that has both the documents and the technology to ensure that the resulting data is as accurate and complete as possible. Lex Machina also adds high-value trial outcomes data to reveal who won cases and what the damage awards were.

Practitioners can now investigate a party's litigation track record, assess a law firm's experience in similar cases, understand the range of damages awarded at trial, or search docket entry text.

The Legal Analytics platform provides data-driven insights and trends in state court. Features available include:

- Searching by judge, law firm, attorney name, or party
- Timing analytics, trial resolutions, trial damages, and trial rulings
- Keyword searching within docket entry text and documents
- Filtering by court or viewing analytics throughout all state court modules
- Court-specific filters

Lex Machina helps you answer questions such as:
