Legal Analytics® for Kings County Supreme Court (Brooklyn)
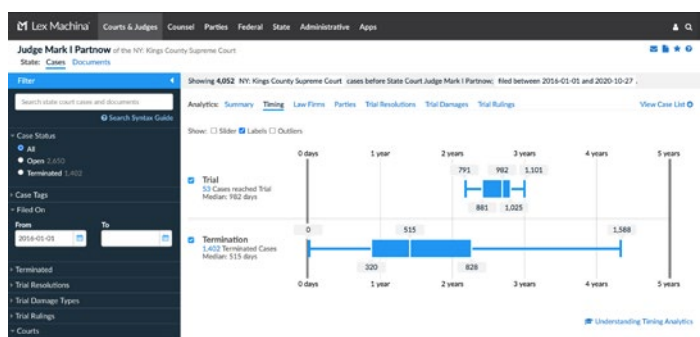

Lex Machina's award-winning Legal Analytics® platform allows outside counsel and in-house attorneys to anticipate the behavior of courts, judges, lawyers, law firms, and parties. Over three quarters of Am Law 100 firms and some of the largest global corporations use Legal Analytics to supplement traditional legal research with previously unavailable strategic insights that gives them a winning edge.

The vast majority of cases in the United States are litigated in state courts, and Kings County Supreme Court is an important venue for New York state litigation. This court covers Brooklyn, the most populous New York city borough (and second most populous county in the United States). Kings County serves a population of over 2.6 million citizens and is a key court for civil cases involving torts, real property, and commercial matters. Now, Legal Analytics is available for Kings County Supreme Court.

Lex Machina

The Winning Edge

Lex Machina gathers raw information from state court cases and the underlying documents, and then it uses a unique Natural Language Processing engine to clean, tag, enhance, and present the resulting data in a way that allows users to make data-driven decisions. Lex Machina is the only analytics provider that has both the documents and the technology to ensure that the resulting data is as accurate and complete as possible. Lex Machina also adds high-value trial outcomes data to reveal who won cases and what the damage awards were.

Practitioners can now investigate a party's litigation track record, assess a law firm's experience in similar cases, understand the range of damages awarded at trial, or search docket entry text.

The Legal Analytics platform provides data-driven insights and trends in state court. Advantages include:

- Understanding timing to key litigation milestones

- Analyzing the record of a specific judge, law firm, attorney, or party

- Reviewing previous trial resolutions, trial damages, and trial rulings for case strategy

- Refining with court-specific filters such as case types and case tags

- Keyword searching within docket entry text and downloaded documents

- Viewing analytics across all state courts or in one particular court

Lex Machina helps you answer questions such as:

- What is the median time to trial and time to termination for cases with Judge Partnow presiding?

- Has an opposing attorney ever appeared in a case before Judge Baily-Schiffman? If so, how many were class action cases, and how many went to trial?

- How many Torts cases have been awarded damages by a jury verdict? Which cases are those and what were the damages in each case?

- How many Commercial Division cases have been filed in the past five years?

Unique Litigation Data

Lex Machina allows users to filter by the following information in order to find the most relevant cases:

Case Types – Commercial, Commercial Division, Employment/Labor Law, Real Property, Tax Certiorari, Torts, Emergency Applications re: Coronavirus, Other Matters, Special Proceedings
