

## Legal Analytics® Quick Tools

Lex Machina's unique Legal Analytics Quick Tools combine instant access to analytics. They deliver answers for specific use cases, such as comparing courts, judges, or law firms, assessing cases, crafting motion strategy, evaluating patent portfolios, and much more.

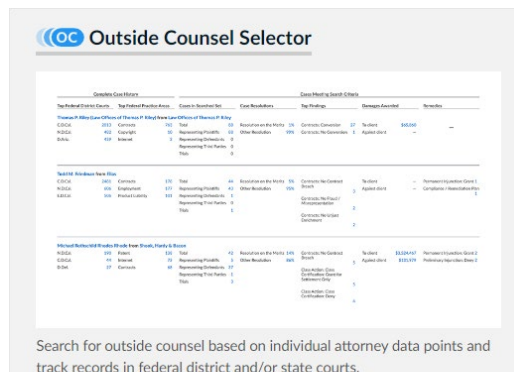

Lex Machina is the only provider offering applications tailored to answering litigation questions quickly and easily by leveraging our Legal Analytics platform and our underlying data modules.

# Compare Courts, Judges, Law Firms, And Parties, Side-by-Side

## Outside Counsel Selector

Outside Counsel Selector provides a quick but comprehensive side-by-side comparison of prospective outside counsel along a myriad of key criteria, including practice areas and courts, numbers of cases litigated, case resolutions, top findings and remedies, and total damage awards.

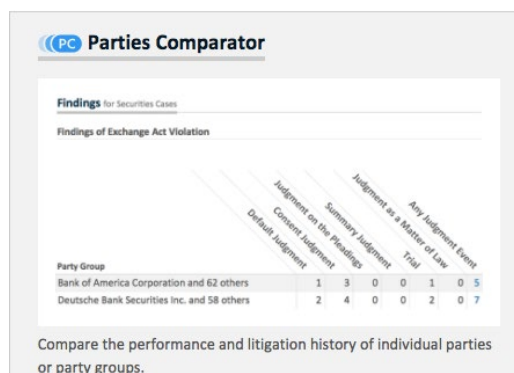

This Quick Tool enables practitioners to gain crucial insights on an attorney's relative level of experience in litigating a certain type of case in specific venues. It offers coverage of attorneys practicing in federal district courts, state courts, or both.

## Parties Comparator

Parties Comparator allows lawyers to compare parties by different criteria, such as litigation volume, performance, and outcomes. For each party being compared, the application shows damages, remedies, and findings won and lost.

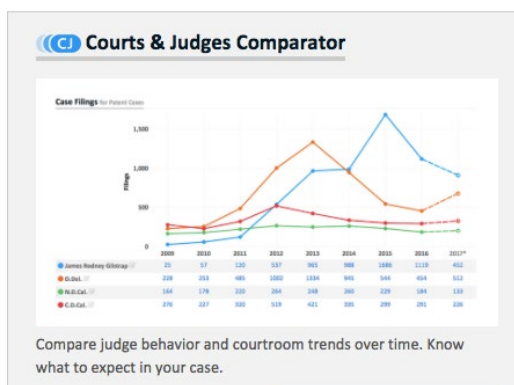

This Quick Tool is invaluable for companies to perform peer benchmarking and for law firms to better understand clients and assess prospects.

## Courts & Judges Comparator

Courts & Judges Comparator enables attorneys to compare up to four federal districts and judges regarding case loads, timing to key milestones, case resolutions, specific findings, and damages.

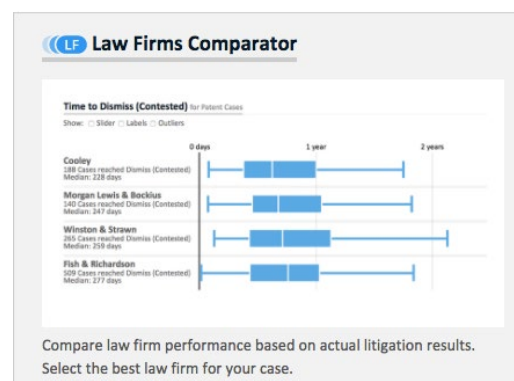

Plaintiffs can compare multiple districts prior to filing, to select the one most likely to provide the most favorable outcome in the shortest amount of time. Defendants can make data-driven decisions about whether or not to pursue transfer and, if so, to where.

## Law Firms Comparator

Law Firms Comparator enables powerful side-by-side comparison of up to four law firms, with instant display of a broad range of case-specific data. Companies choosing outside counsel, and law firms competing for new business, can now compare actual results produced by law firms in their open and terminated cases.

The Quick Tool provides insights into each firm's open and terminated cases, the party roles of their clients, and data about case resolutions, damages, remedies, and findings.

Attorney Team Analyzer makes it easy to see the shared case history of a team of attorneys. How recently did these attorneys work together and on what cases? Enter up to five attorney names to see their personal case counts, the group's shared case frequency, case type frequency, and a comprehensive list of all shared cases. In-house counsel can use this information to size up potential outside counsel by seeing how well and how often they've worked together in the past.

# Custom Insights Made Easy

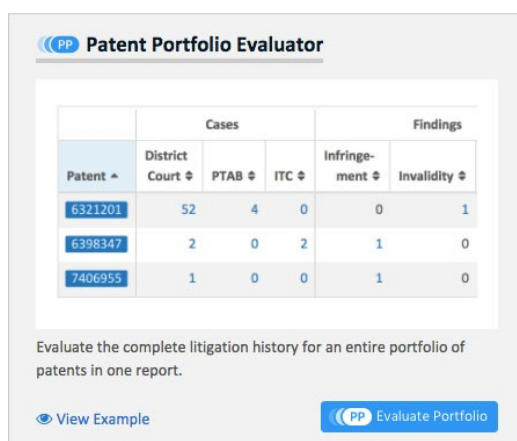

## Expert Witness Explorer

Expert Witness Explorer gives attorneys insight into the admissibility of expert witness testimony in Product Liability and Torts cases. Enter the name of an expert witness, and immediately see their admissibility record, which judges ruled on their admissibility, top parties who retained the expert, and all relevant admissibility orders. Searching by judge or court provides analytics on admissibility of expert witnesses, top witnesses, and top parties moving to retain.

## Patent Portfolio Evaluator

Patent Portfolio Evaluator gives you the complete litigation history for an entire patent portfolio in one report. See the District Court, PTAB, and ITC cases in which each patent has been litigated. Examine any damages awarded or findings of infringement, invalidity, or unenforceability. Quickly determine whether each patent has been battle-tested by extensive litigation and understand the results of that litigation.

## COVID-19 Impact Analyzer

COVID-19 Impact Analyzer allows you to analyze the impact of COVID-19 on the federal district court system in 2020. This Quick Tool provides a snapshot survey of cases filed and findings made in response to the pandemic. Easily compare changes across key metrics between 2020 and the two previous years in order to gain insights into what changed and by how much.
