

What Is It?

Lex Machina is the creator of **Legal Analytics**, the leading platform for litigation insights about **courts, judges, lawyers, law firms, and parties**. We help litigators land more clients and win more cases.

Our Legal Analytics provide practice-specific information on case **resolutions, timing, findings, damages, remedies**, and more. Over 3/4 of AmLaw100 firms, as well as many of the largest corporations in the world use Lex Machina.

Unique Benefits

- The most **accurate and valuable** data, compiled, cleaned, and enhanced by a combination of automation and in-house legal experts.
- Unique **Practice-specific** data and tags that produce valuable strategic insights
- The highly customizable **Case List Analyzer** enables meaningful analysis of cases like yours.
- **Attorney Data Engine** fixes many of the data issues with unreliable legal data, providing you an accurate picture of a lawyer's experience and track record.
- The only **Legal Analytics Apps**, for comparing judges, parties, law firms, creating winning motions, exploring damages, or expert witnesses.
- It's also really **easy to use**, and gets results with just a few clicks that otherwise could take days or weeks to compile.

Case Studies

- The GC of a High Tech company has only one paralegal, but because they launch a lot of physical products into the market, they face a lot of IP threats. She said: "Sometimes I need a big bat and sometimes I need a small bat. One has a much higher price tag than the other. Lex Machina helps me choose the correct counsel for the circumstances."
- You are bringing in 4 firms to interview for specific work. They all will have brag books and say they are the best. What does the data say about their success rates, their familiarity with your type of case, your judge, your court, your opponent. How quickly have they achieved success. Add data to the due diligence process and not just reputation and anecdotal evidence.
