

Legal Analytics® for New York Courts

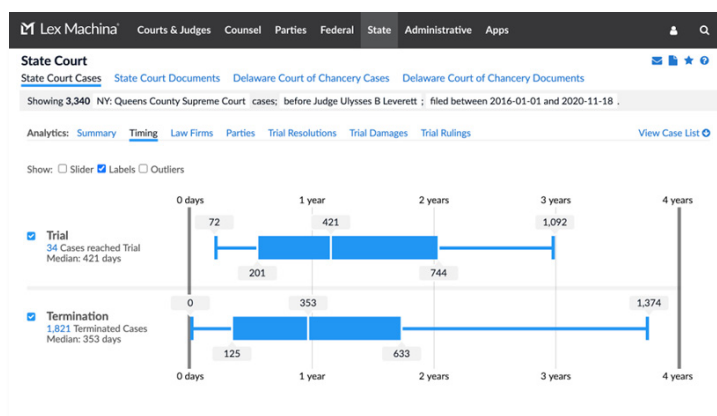

Lex Machina's award-winning Legal Analytics® platform allows outside counsel and in-house attorneys to anticipate the behavior of courts, judges, lawyers, law firms, and parties. Over 80% of Am Law 100 firms and some of the largest global corporations use Legal Analytics to supplement traditional legal research with previously unavailable strategic insights that gives them a winning edge.

The vast majority of cases in the United States are litigated in state courts, and the courts in New York are important venues for state court litigation. Lex Machina's Legal Analytics for Oklahoma courts include eight state courts serving the following counties: Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk, and Westchester. They cover all five of New York City's boroughs, along with the majority of the population of New York state. They serve some of the most ethnically and economically diverse populations in the United States. These New York Courts are important venues for state court litigation, particularly for civil cases involving torts, real property, and commercial matters.

The Winning Edge

Lex Machina gathers raw information from state court cases and the underlying documents, and then it uses a unique AI engine to clean, tag, enhance, and present the resulting data in a way that allows users to make data-driven decisions. Lex Machina is the only analytics provider that has both the documents and the technology to ensure that the resulting data is as accurate and complete as possible. Lex Machina also adds high-value trial outcomes data to reveal who won cases and what the damage awards were.

Practitioners can now investigate a party's litigation track record, assess a law firm's experience in similar cases, understand the range of damages awarded at trial, or search docket entry text across states.

The Legal Analytics platform provides data-driven insights and trends in state court. Advantages of state court analytics include:

- Understanding timing to key litigation milestones
- Analyzing the record of a specific judge, law firm, attorney, or party
- Reviewing previous trial resolutions, trial damages, and trial rulings for case strategy
- Refining with court-specific filters such as case types and case tags
- Keyword searching within docket entry text and downloaded documents
- Viewing analytics across all state courts or in one particular court

Lex Machina helps you answer questions such as:

- What is the median time to trial and time to termination for post-RJI cases with Judge Silvera presiding in New York County Supreme Court?
- Has an opposing attorney ever appeared in a case before Judge Baily-Schiffman in Kings County Supreme Court? If so, how many were class action cases, and how many went to trial?
- In Suffolk County Supreme Court and Westchester County Supreme Court, how many commercial cases had damages awarded at trial? Which cases are those and what were the damages in each case?
- Who are the top parties filing Commercial Division cases in Queens County Supreme Court over the past five years?

Unique Litigation Data

Lex Machina allows users to filter by the following information in order to find the most relevant cases:
