

## Legal Analytics® for New York County Supreme Court

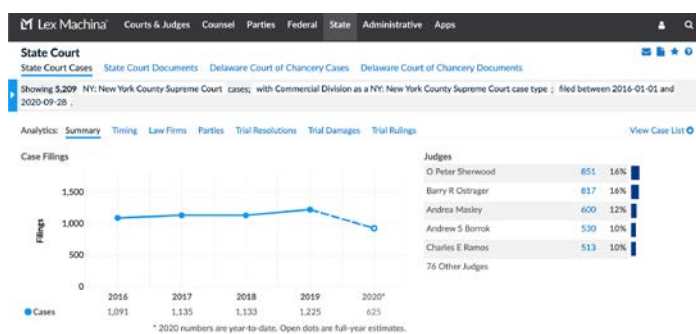

Lex Machina's award-winning Legal Analytics® platform allows outside counsel and in-house attorneys to anticipate the behavior of courts, judges, lawyers, law firms, and parties. Over three quarters of Am Law 100 firms and some of the largest global corporations use Legal Analytics to supplement traditional legal research with previously unavailable strategic insights that gives them a winning edge.

The vast majority of cases in the United States are litigated in state courts and New York County Supreme Court is a crucial venue for New York state litigation. Located in the business epicenter of New York City, New York County is a key court for civil cases involving torts, tax, and commercial matters and serves more than 1.6 million citizens in Manhattan alone. Now, Legal Analytics is available for New York County Supreme Court.

## The Winning Edge

Lex Machina gathers raw information from state court cases and the underlying documents, and then it uses a unique Natural Language Processing engine to clean, tag, enhance, and present the resulting data in a way that allows users to make data-driven decisions. Lex Machina is the only analytics provider that has both the documents and the technology to ensure that the resulting data is as accurate and complete as possible. The company's team of legal data experts also add high-value trial outcomes data to reveal who won cases and what the damage awards were.

Practitioners can now investigate a party's litigation track record, assess a law firm's experience in similar cases, understand the range of damages awarded at trial, or search docket entry text.

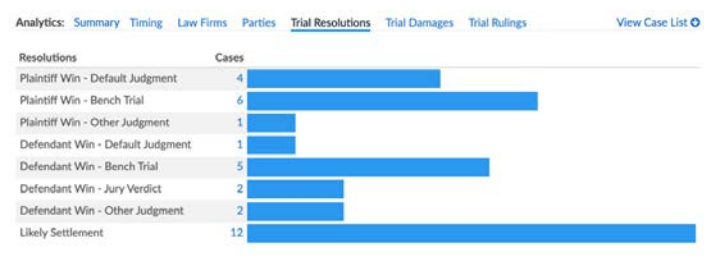

The Legal Analytics platform provides data-driven insights and trends in state court. Advantages include:

- Analyzing the record of a specific judge, law firm, attorney, or party
- Understanding key timing analytics
- Reviewing previous trial resolutions, trial damages, and trial rulings for case strategy
- Keyword searching within docket entry text and downloaded documents
- Viewing analytics across all state courts or in one particular court
- Court-specific filters such as case types and case tags

Lex Machina helps you answer questions such as:

- What is the median time to trial and time to termination in cases with Judge Kovach presiding?
- How much experience does the opposing law firm have in this venue? Has the firm ever taken a case to trial here, and, if so, what was the resolution?
- How many Contract cases have been awarded damages by a jury verdict? Which cases are those and what were the damages amounts?
- Has an opposing attorney ever appeared in a case before Judge Hawkins? If so, how many were Employment cases?
