

Legal Analytics[®] for Oregon Courts

Lex Machina's award-winning Legal Analytics[®] platform allows outside counsel and in-house attorneys to anticipate the behavior of courts, judges, lawyers, law firms, and parties. Over three quarters of Am Law 100 firms and some of the largest global corporations use Legal Analytics to supplement traditional legal research with previously unavailable strategic insights that gives them a winning edge.

The vast majority of cases in the United States are litigated in state courts, and the courts in Oregon are important venues for state court litigation. Lex Machina provides comprehensive coverage of all 36 circuit courts in Oregon, serving all 36 counties in Oregon (the "Oregon Courts"). Now, Legal Analytics is available for civil cases filed in courts that serve the population of Oregon.

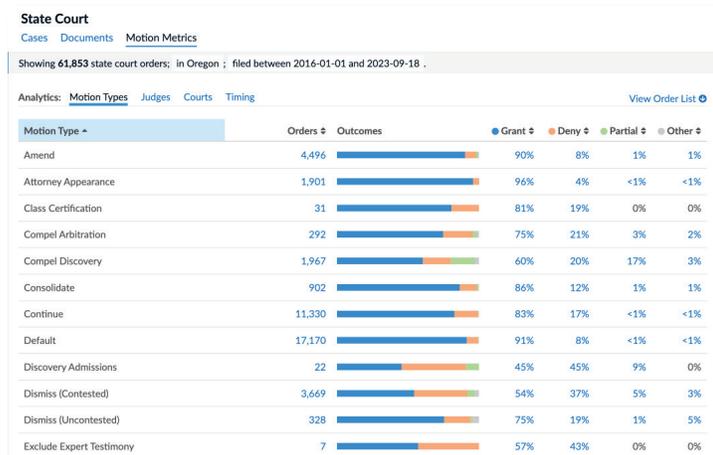

The Winning Edge

Lex Machina gathers raw information from state court cases and the underlying documents, and then it uses a unique artificial intelligence engine to clean, tag, enhance, and present the resulting data in a way that allows users to make data-driven decisions. Lex Machina is the only analytics provider that has both the documents and the technology to ensure that the resulting data is as accurate and complete as possible. Lex Machina also adds high-value trial outcomes data to reveal who won cases and what the damage awards were.

Practitioners can now investigate a party’s litigation track record, assess a law firm’s experience in similar cases, understand the range of damages awarded at trial, or search docket entry text across states.

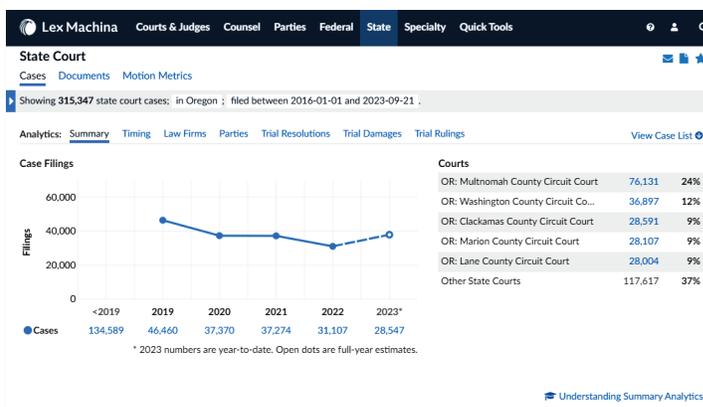

The Legal Analytics platform provides data-driven insights and trends in state court. Advantages of state court analytics include:

- Understanding timing to key litigation milestones
- Analyzing the record of a specific judge, law firm, attorney, or party
- Reviewing previous trial resolutions, trial damages, and trial rulings for case strategy
- Refining with court-specific filters such as case types and case tags
- Keyword searching within docket entry text and downloaded documents, as well as across state courts
- Viewing analytics across all state courts or in one particular court

Lex Machina helps you answer questions such as:

- In Lane County Circuit Court, Marion County Circuit Court, and Deschutes County Circuit Court, how many court orders have been issued ruling on summary judgment motions? What was the grant rate of summary judgment motions over the same period of time?
- How many Medical Malpractice cases were filed against Willamette Valley Medical Center, LLC in Yamhill County Circuit Court since 2019?
- What was the median time to trial and time to termination for cases with Judge McHill presiding in Linn County Circuit Court?
- Has an opposing party ever appeared in a case before Judge Johnson in Douglas County Circuit Court? If so, how many cases were contracts cases, and did any involve awarded damages?

Unique Litigation Data

Lex Machina allows users to filter by information such as the following in order to find the most relevant cases:

Document Tags – Answer, Complaint, Judgment, Jury Verdict, Order

Trial Damages – General Damages (Judgment on the Merits), General Damages (Jury Verdict), Attorneys’ Fees / Costs

Trial Rulings – Bench Trial, Jury Verdict, Consent Judgment, Default Judgment, Other Judgment

Trial Resolutions – Plaintiff Win, Defendant Win, Likely Settlement, Procedural
