Survey Methodology: ALM Legal Intelligence conducted research on behalf of LexisNexis to better understand how lawyers and their firms use legal analytics in their litigation practices. ALM surveyed litigators, trial attorneys and librarians at Am Law 200 firms between October 18 and November 6, 2017. A total of 321 litigators, trial attorneys and librarians at AmLaw 200 firms participated in the survey between October 18 and November 6, 2017. For purposes of the survey, legal analytics is defined as "tools and/or capabilities powered by artificial intelligence technology capable of sorting through huge amounts of data to find trends associated with specific courts, judges, expert witnesses, etc." Lex Machina conducted a use-case survey among its customers to learn how they are gaining value in their business or practice with Lex Machina's Legal Analytics. The survey was conducted between September 19 to 28, 2017 and a total of 238 users from law firms and companies responded.
